AMERIKOOLER: MAKING THE DIFFERENCE IN MAXIMIZING ENERGY EFFICIENCY

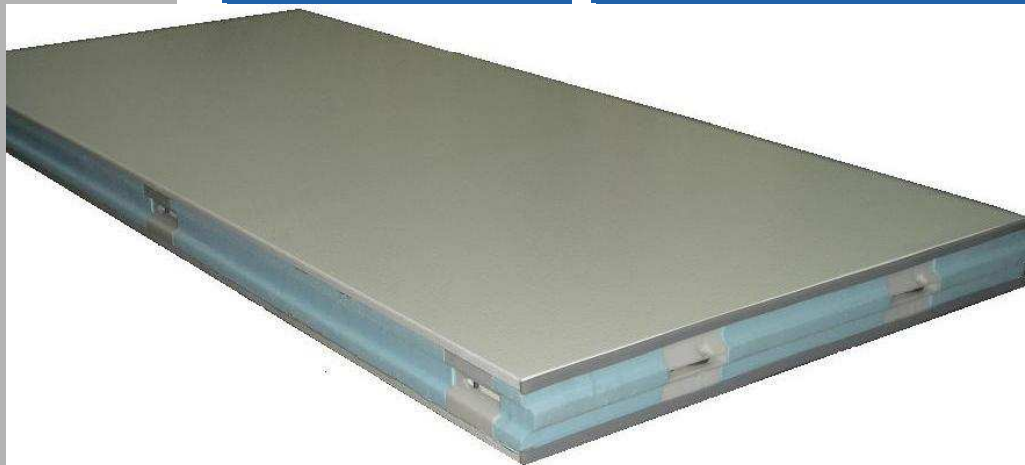

# Company Background

- Manufacturers of Walk-in Coolers, Freezers and Refrigerated Warehouses
- 25 years of continued successful operations
- A national and international company with business in over 30 Countries
- Over 200,000 square foot Miami, FL facility with state of the art production capacity to meet our short and long term projections

# Company Background

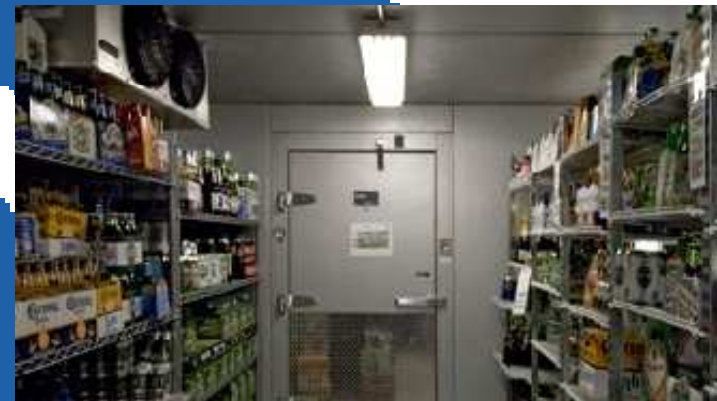

- ↳ Continuous cutting-edge production improvements achieved through extensive research and development
  - The most sophisticated integrated network of robotic CAD-CAM machines and custom software providing precision quality products
  - Same day quotes and approval drawings within 48 hours
- ↳ A 50% increase in production capacity beginning early 2009

# Market Industries

## Industries Served

- Five Star Restaurants
- Mom and Pop Restaurants
- Fast Food Restaurant chains
- Convenience Stores
- Supermarkets
- Hotels
- Recreational Parks
- Schools, Colleges and Universities
- Hospital and Corporate Cafeterias
- Mortuary, Small and Large Freezers
- Refrigerated Warehouses

# Market Industries

## Door Industries

- ↘ Replacement doors for existing coolers and freezers
- ↘ New Doors
  - ↘ Hinged solid and glass doors
  - ↘ Traffic single and double action swing doors
  - ↘ Horizontal manual sliding and electric operated doors
  - ↘ Vertical lift and sectional doors for receiving and shipping in refrigerated loading docks

# Customer Support

## Customer Support

- Account Manager dedicated exclusively to your account
- Production capacity to support any type of growth
- Promotional material
- Expanded distribution
  - National and International
- Technical Support
- Same-day quotes
- Approval drawings within 48 hours
- Customer Service
  - Order status, warranties, shipment information

# Strengths of Amerikooler

## ↳ Amerikooler's excellent customer reputation

- ↳ Most efficient production facility
- ↳ Most reliable product
- ↳ Continuous manufacturing and technological improvements

## ↳ Competitive Pricing

## ↳ Strong Alliance with Heatcraft Refrigerated Products

- ↳ Climate Control, outdoor, complete pre-assembled systems
- ↳ Warranty of 1 or 5 years parts and labor 24 hours, 7 days a week, 365 days a year offered by Heatcraft within the continental U.S.

## ↳ Ultra-efficient packaging system that saves on shipping costs

## ↳ Financial Stability

## ↳ Management Expertise

# Strengths of Amerikooler

- ✦ Amerikooler's 4" thick walk-in coolers and freezers with **AK-XPS4™** meet and exceed the federal requirements of the U.S. Energy Independence and Security Act of 2007; effective January 1<sup>st</sup> 2009 which requires R-25 Coolers or R-32 Freezers
  - ✦ **STYROFOAM® brand Panel Core** extruded polystyrene (XPS) foam insulation, blue in color, is manufactured by The Dow Chemical Company. Dow's proprietary extrusion process minimizes foam voids found in other competitive products and enables precise control of key foam attributes including density, compressive strength, cell size and cell orientation. With **STYROFOAM® brand Panel Core** insulation, you get a consistently high quality, closed cell foam insulation with hydrophobic characteristics and tight dimensional tolerances for long-term panel integrity and enhanced energy efficiency over the life of your walk-in coolers and freezers.
- ✦ Amerikooler's walk-in **R-values** using **STYROFOAM® Panel Core (AK-XPS4™)** insulation are:
  - R-29 for coolers or R-32.4 for freezers**
